

Indented Cylinders JCT

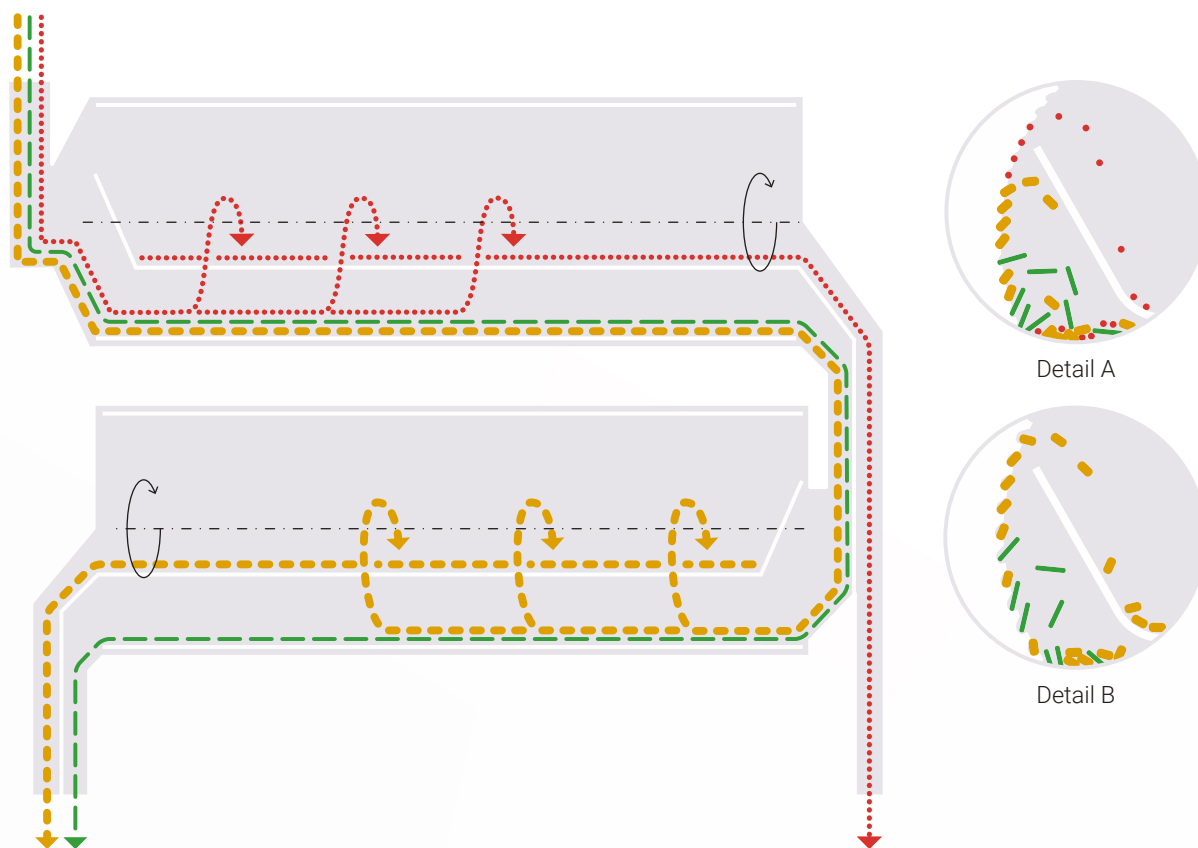

We separate the wheat from the chaff

- › Used for separating impurities and admixtures which has different length than grain
- › Easy adjustment at different grain variety
- › High capacity machine with compact construction
- › Easy installation, commissioning and operation
- › Robust body with operational reliability

JCT		515	625	930
Cylinder diameter	mm	500	600	900
Cylinder length	mm	1500	2500	3000
Capacity	t/h	2	5	10
Function	R – Round grain separating (broken grain, bedstraw) L – Long grain separating (oat) RL – combined round and long separating PLR – combined separation of short/round and long admixtures with pre-sorting			

Functional Diagram of the Indented Cylinder JCT

- Clean product
- Coarse impurities
- ... Small impurities
